

Staff to Senior Staff Engineer/Geologist/Scientist – Emeryville

We are seeking Staff to Senior Staff Engineer/Geologist/Scientist with up to 5 years of work experience to perform field and office duties on diverse environmental projects, including site investigation, hazardous waste remediation, surface water quality, and environmental compliance.

Duties include, but will not be limited to,

- Performing field work on an as-needed basis including collecting field measurements and samples; documenting field observations and activities; directing/monitoring contractors performing drilling and earthwork; and performing routine maintenance on remote data collection and remediation equipment.
- Planning, coordinating and writing reports that document field data, including developing figures and tables, analyzing data, and presenting conclusions.
- Reviewing field data and notes, performing quality control procedures for field work, and interpreting results to ensure regulatory/permit compliance and evaluate progress.
- Coordinating, scheduling and directing field activities for other technical staff.
- Analyzing and synthesizing lithologic, hydrologic and geochemical data; reviewing regulatory requirements and best management practices for environmental compliance; assisting with the design and implementation of environmental remedies for site cleanup and surface water projects; and performing other related work as required.

Requirements include a BS degree in civil or environmental engineering, geology, geophysics, hydrogeology, hydrology, soil science or similar technical field, with an MS degree preferred. Must be willing and able to perform field work in all weather conditions and wear a respirator as required. Also required is a strong working knowledge of Microsoft Office 365 Suite; CAD and ArcView GIS knowledge is beneficial.

This position is based in our Emeryville office but offers flexibility in working from our Mountain View office periodically or on a more frequent basis. Travel to Northern California project sites will be required.

The successful candidate must present a DMV record upon request and have a driving record acceptable under Weiss Associates' insurance carrier's requirements.

To apply, submit resume and cover letter to jobs@weiss.com, referencing Job#SSSEGS012016 in the subject line.
